## CORE COMPETENCIES

- Full-stack development, testing, and integration
- Secure and Functional System Engineering Processes
- Cloud-based services implementation (IaaS, SaaS, PaaS)
- Cloud migration and services (AWS, AZURE)
- Professional Training and Development
- Learning Management System development
- Agile-scrum and SaFE-Agile implementation
- Project and Program Management
- Independent Verification and Validation (IV&V)
- Test planning, design, automation, penetration testing
- Accessibility 508 compliance testing
- DevOps, DevSecOps, CI-CD implementation
- Release & Configuration management
- Cybersecurity Planning, Operations, and Risk management
- Cloud-based Development, Testing, and Integration
- Database management, ETL, and Analytics

## CERTIFICATIONS

## KEY BENEFITS

- Our emphasis is on professional development through learning
- We are committed to finding the "Right Solution"
- Great pool of experienced professionals
- Development through innovation

## PARTNERS

### **DISA/DITCO-SCOTT-PL83 DOD**

#### **Microsoft Dynamics CRM 2011**

AgileITech was the Prime contractor for updating CRIMS user training content from CRM 2011 to Dynamics 365. The project included theme development, data migration, and extensive testing, supporting over 400 users globally. AgileITech's approach involved a thorough content assessment, data cleansing, and the application of SAFe principles for quality assurance. The team ensured seamless software migration, rigorous performance testing on AWS Cloud, and robust security enhancements, resulting in a secure and efficient training platform.

### **U.S. Department of Transportation (DOT)/Federal Motor Carrier Safety Administration (FMCSA)**

#### **URS Portal**

AgileITech was a subcontractor for iWorks on the URS Portal project for the Department of Transportation (DOT). The project involved creating a classified platform to streamline the Unified Registration System (URS) and enhance the registration process for FMCSA. AgileITech developed key features including a Communications Dashboard for centralized communication, an Automated Pre-Screening Feature to improve registration accuracy, and advanced Messaging and Event Management for secure communication and compliance management. Additionally, robust administrative functions were implemented for better control, and comprehensive analytics were integrated to provide real-time data insights. The URS Portal significantly improved FMCSA's ability to maintain accurate regulatory information, contributing to a more efficient and secure transportation industry.

### **USAID**

#### **Development Information Solution (DIS)**

AgileITech was a subcontractor for USAID on the development and enhancement of DIS, a web-based portfolio management system for USAID. The project involved creating a Java-based search engine, extensive testing (including performance, 508 compliances, and mobile testing), and implementing an automated testing framework. Key achievements included successful AWS cloud integration, streamlined data tracking and reporting, and improved system functionality, all within an Agile Scrum framework.

### **US Department of the Treasury (USDT)**

#### **FinCEN (Treasury)**

AgileITech, as a subcontractor, provided comprehensive IT Systems Management and technical services for FinCEN, including web application development, data-driven testing, and performance monitoring. The project involved implementing a robust DevOps strategy, automating testing processes, and ensuring compliance with 508 and mobile testing requirements. AgileITech supported FinCEN's mission by enhancing data management, cybersecurity, and system operations through advanced analytics and risk management practices.

### **OURCARE**

#### **OPTDATA - CLASSIFIED SITE DEVELOPMENT**

AgileITech Corporation served as the prime contractor for the OPTDATA project with Ourcare from February 2018 to present. The project involved developing and maintaining both a web-based application and an Android mobile app for managing client medical information. Utilizing Agile Scrum methodologies, the team delivered a solution with features including nurse interaction capabilities, two-factor authentication, and cloud storage on Microsoft Azure. The project also encompassed extensive testing across platforms, including performance, security, and usability, supported by a robust team of developers, testers, and project managers.
